The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Raish in view of Esche.

In the former see the head 24, hose 50, source at 28 and mounting bracket at 20. Lacking is the slidable weight. Esche teaches the weight at 150 in a similar art device used to retract the hose. It would have been obvious to provide the former with the weight of the latter for its disclosed function in that both teach identical art devices. The bracket of the former is slotted as recited in instant claim 2.

Claims 3-4 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/26/05.
